Only the finest machines for a first class College

# FUELING THE FUTURE WITH LIQUIDLINE COFFEE

Downing College  
Cambridge

---

## Overview

The picturesque grounds of Downing College situated in the centre of Cambridge were founded in 1800 by Sir George Downing. Downing's neo-classical buildings, home to 420 undergraduates, 220 graduates, 50 fellows and over 130 staff are set amongst elegant, well-kept gardens.

## Opportunity

With over 20 acres of artistry and 27 buildings the college was in need of a reliable refreshment facility. Our Business Development team contacted Downing College and were introduced to Geoff – the college's Catering Manager. Geoff was interested in our equipment innovation, Fairtrade commitment and superior service. From then Geoff and our Managing Director have built a strong relationship based on trust and commitment.

## HYDRATION MOTIVATION INVIGORATION

### The Solution

The machine chosen for Downing College's main refreshment facility was the Cafetouch 2. Manufactured in Switzerland, the Cafetouch 2 truly sets the benchmark for fully automatic coffee machines. This energy efficient machine has 8 different drink selections, with a choice of 2 drink sizes and a jug facility. The black gloss finish sits smartly in a range of vicinities and can be custom designed to your brand or logo.

Liquidline have also installed a Wave Fizz Machine, Jura Impressa F8, CB3600, Flavia C200, Jura Impressa XS9, Gaia Bean-To-Cup and a Cimballi 2 in Downing College.

“ The most memorable part of working with Liquidline is seeing the relationship grow from its origins into what it is now, a mutual respect for one and other. The quality of the machines is very good and the service is very responsive and helpful.

**Geoff Jameson (Catering Manager)**

”

As part of Liquidline's service commitment, all maintenance is provided free of charge to Downing College – providing they continue to purchase our consumables.
