## Moving into the top class

The new GIGA X3 Professional offers everything needed by staff in a large office or break-out room. It delivers up to 31 individually programmable speciality coffees and another 12 barista recipes at the touch of a button, including the en-vogue flat white. As well as offering simple operation, it takes minimum effort to refill thanks to the large bean container with a holding capacity of 1 kg and aroma preservation cover. Other features include an optional coffee grounds disposal function and drip drain set. Integrated rinsing and cleaning operations started at the touch of a button minimise the amount of work needed to maintain the machine on a daily basis. It's sure to go down a treat with your staff. A large water tank and large coffee grounds container allow for flexible and mobile use.

### Technologies

43 specialities, as well as the start screen, can be individually programmed to suit the occasion or customer. For instance, products can be renamed and arranged to the user's liking on the display. The high-performance ceramic grinder, controlled by electronic motors, guarantees quick, precise, even and consistent grinding for many years to come. As an ingenious feature, the air intake in the dual spout is electrically adjusted by a geared stepper motor. When you make a latte macchiato, the machine automatically dispenses hot milk followed, without a pause, by milk foam into the glass. This feature saves valuable time.

### Cleaning/Hygiene

As well as being easy to operate and programme, the machine is designed to be very easy to care for. The integrated rinsing, cleaning and descaling programmes reduce the effort involved to a minimum and guarantee TÜV-certified hygiene.

### Customisable

With a wide selection of accessories including a cup warmer, milk cooler, coffee grounds disposal function set, drip drain set and interface for accounting systems, as well as an attractive range of storage and presentation units, it is possible to create a complete coffee solution tailored to your specific requirements.
