JUICETOUCH

Our Juicetouch brand offers you three different flavours of juice to choose from for your workplace environment. It's time to test your tastebuds with a fruity offering of orange, tropical and apple with the option of chilled or sparkling water. Juicetouch is a healthy, eco-friendly alternative. It goes against all traditions. It pushes the boundaries.

With speedy WiFi connection, this machine takes all the weight off your shoulders. Efficiency is key with Juicetouch. It provides you with an easy to use touch screen display, timed juice dispense periods for your morning wake-up call and a LED cup lit dispense area. It is innovative and cost effective and offers you a trendy alternative to your workplace.

TESTIMONIAL

Bishop's Stortford College is one of the leading independent, co-educational schools in the country. The school is set in beautiful grounds in the market town of Bishop's Stortford, Hertfordshire.

The school's catering team face the enormous task of providing a tasty, yet healthy food menu along with hot and cold beverages and snacks to the school's 1100 pupils together with staff and guests.

Liquidline understand that the catering team at the college are under a great time pressure and have a very broad remit. The operation must run like clockwork and all equipment must be reliable and keep up with demand. Liquidline and Bishop's Stortford College have consistently worked together to bring innovative solutions to challenges and to enhance the offer available to students, staff and guests.

“Our new coffee and juice machines are so much better than our old machines. They give a much better tasting coffee, they are easier to clean and less time consuming. The digital screens are so easy to use and the fact that you can stop a drink if you only want half a cup of juice is a great asset. We as a school are so pleased that we decided to swap to the digital coffee and juice machines.”

Gary Law - Head of Catering, Bishop's Stortford College
