

Liquidline Q3

Bean to Cup Coffee Machine

Enjoy a wide selection of coffee-based beverages with the Liquidline Q3 commercial coffee machine. Designed for high-footfall areas, this advanced machine serves great value, high quality refreshments in a matter of seconds.

LIQUIDLINE
Altogether better

Liquidline

Q3

Indulge in a menu of delicious Italian-style specialty coffee with the Liquidline Q3. With an ultra-stylish aesthetic, easy to use operation, and capable of serving up to 250 cups of freshly ground espresso-based beverages per day, the Q3 stands up to the demands of even the busiest workplace.

10 DRINK OPTIONS

Choose from 10 drink options, from classic coffee favourites such as espresso, latte and cappuccino, to chocolate and mocha for those with a sweeter tooth. Thanks to the extra soluble canister, this machine offers instant decaf, for those that enjoy coffee without the buzz. A separate hot water tap also allows for the preparation of tea.

USER FRIENDLY OPERATION

Ordering from the Liquidline Q3 couldn't be easier. With integrated distance selection technology, you can select your drink of choice by hovering your finger above the surface of the screen. Simply place your cup in the dispense area, select your drink from the beautifully designed icons and it will dispense in a matter of seconds.

HIGH PRESSURE BREWING

The Liquidline Q3 features a dual boiler system with separate high-capacity pressure and atmospheric boilers. This enables the Q3 to produce up to 30 litres of hot water per hour, ensuring your busy team is continually supplied with delicious coffee to fuel them through the day.

EFFORTLESS MAINTENANCE

Designed with operational simplicity in mind, the Q3 features removable waste containers for easy cleaning. The large bean and powder hoppers also ensure that refills are infrequent, meaning minimum day-to-day maintenance.
